Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nissinen et al (WO 02/072953) for reasons set forth in the previous office action.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2, 4, 5, and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nissinen et al (WO 02/072953) in view of Garrett (US 3,388,965) for reasons set forth in the previous office action.

Response to Arguments

Applicants' arguments filed 1/20/2010 have been fully considered but they are not persuasive.

Applicants contend that the 102 rejections under Nissinen should be withdrawn because in Nissinen, nozzles 36 blow "moist air or steam into the entry gap of the web in order to moisten the air entering the application chamber and to improve condensation on the cooled surfaces of the chamber." (Nissinen, page 14, lines 2 to 5). While in applicants' specification, these two options, moist air or steam, have drawbacks which the invention recited in claim 1 overcomes.. Therefore, spraying water into a coating application chamber is contrary to the teaching of the

prior art, which teaches that liquid water should not be sprayed onto a paper web being coated or into a coating application chamber.

The above argument is insufficient to withdraw the 102 rejection under Nissinen because all structural elements as claimed (claims 1 and 3) have been met.

Applicants contend that all remaining claims rejected under 103 with Nissinen in view of Garrett should be withdrawn because Garrett does not disclose spraying water droplets, and therefore does not add what is missing from Nissinen with respect to applicants' independent claim 1.

This argument is insufficient to withdraw the 103 rejection under Nissinen with Garrett against all remaining claims (2, 4, 5, and 10-12) because all remaining claimed structural combinations are deemed to be within the purview of one skilled in the art for reasons set forth in the previous office action. The proper motivation for the combination of Nissinen with Garrett has been set forth as required by *Graham v. Deere*.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
